

Revised Closing Dates for Funding Announcements

Due to the recent lapse in appropriations and Federal government shutdown, the NCCOS Competitive Research Program has extended the deadlines for our current funding opportunities. Federal funding opportunities (FFOs) whose deadlines have past will be reopened, starting today, for 30 days. An additional 30 days will also be added to those funding opportunities that are currently open. The new deadline for each of the funding opportunities is below. There will be no further extensions for these FFOs.

<u>Program</u>	<u>Opportunity Number</u>	<u>New Closing Date</u>
----------------	---------------------------	-------------------------

Open to All Applicants

2019 Deep Coral Reef Ecosystem Studies Program: American Samoa	NOAA-NOS-NCCOS-2019-2005821	February 28, 2019
--	-----------------------------	-------------------

---	-----------------------------	---------------

Only Open to Applicants Who Met the Letter of Intent Requirements in the FFO

2019 Ecological Effects of Sea Level Rise Program	NOAA-NOS-NCCOS-2019-2005813	February 28, 2019
---	-----------------------------	-------------------

National Competitive Harmful Algal Bloom Programs	NOAA-NOS-NCCOS-2019-2005810	
---	-----------------------------	--

2019 Monitoring and Event Response for Harmful Algal Blooms		February 28, 2019
---	--	-------------------

2019 Ecology and Oceanography of Harmful Algal Blooms		March 4, 2019
---	--	---------------

As the current continuing resolution ends on February 15, 2019, we strongly encourage investigators to reach out to the respective FFO contacts to address any questions and to submit their applications to Grants.gov ahead of the new deadlines. For those who have already submitted a proposal but wish to provide an updated submission, you may submit a complete new proposal through Grants.gov. We will use the last version received by the revised deadline. If you consider your currently submitted proposal as final, then no action is required.

Please email any questions you may have to the Program Manager for the relevant FFO. We apologize for any inconvenience the government shutdown may have caused.
